## SCHOOLGIRL ATHLETES

CENTRAL PARK GAY WITH THEIR GAMES AND DANCES.

More Than 3,000 Youngsters in White With Hair Ribbons of Every Shade Take Part-Pat Hall and Dances of Many Countries in the Celebration

The big meadow in Central Park, just off the West Drive opposite the Sixty sixth street entrance, where ordinarily you see nothing more exciting than a flock of fat sheep or little boys and girls rolling on the clean grass, was all aflutter vesterday afternoon. Flutter is the word ecause there was a stiff breeze which had a lot of fun with the skirts of 3,000 or gre little girls and which took an impish delight in laying Maypoles low. The little girls were there from fifty schools in Manhattan to hold the third annual park féte of the girls' branch of the Public Schools Athletic League.

Although the folk dances and games didn't begin until 4 P. M., one really had to get up very early in the morning to be at the park by 8 A. M. It was necessary to get there then because Elizabeth Burchenal leaped into the park at exactly Miss Burchenal is a school teacher, but it is right to say that she leaped.

"Elizabeth," said one of the elderly teachers yesterday, "is so athletic. You look for her here and she is there, and when you look there, she im't."

It is Miss Burchenal's business to be in the public schools, with a mission of small charges physically fit and of keeping being taught things that are coming to be regarded as important as book knowledge. She is young and good looking; can run 100 yards in under 15 seconds and can play tennis like a Larned.

She had to be in the park at 8 o'clock to plot off the meadow and fix the place for every school, the spot where it would erect its May pole and take part in the dances. With a sketch of the ground in her hand and two youthful and extremely galiant traffic policemen in attendance, Miss Burchenal covered the meadow in a series of leans, sticking up little red flags with numbers on them. Then the police of the East Sixty-seventh street station had to be instructed as to their duties and told to keep the meadow clear of the the principals of all the schools had to be telephoned to have their columns there on the minute. So, all in all, Prof. Burchenal had got to the point where the ordinary young woman would have said that she was ready to drop by the time the first column of pink and pinafored little girls defiled on to the meadow from

Sixty-eixth street and Central Park West.
The crowd was there certainly. It
massed around the great green square
until the policemen were forced to sprint up and down to keep people from over-flowing on to the grass Perhaps half the crowd—and at least 10,000 must have the crowd—and at least 10,000 must have watched the dancing—were parents or friends of the little girls. The rest were park visitors eager to behold a novely in the way of an open air show. It was a novelty, although May parties are common, because of the Old World dances in which the children had been carefully instructed in odd half hours after school work.

One noticed along the fringe of the quadrangle a good many hundred hitte boys who seemed divided between envy and scorn. You could see that they would have been tickled to show off in Front of so many people, but nevertheless they pretended that it was nothing but a girls' show and quite unworthy of attention

Form serious people.

Between 3 P. M. and 4 P. M. there was a steady flow of excited children to the meadow. Column after column, preceded by dignified and smiling teachers with by dignified and smiling teachers with other teachers walking at the rear to see that none of the little people strayed away, came upon the meadow, the girls walking two by two. Every little girl in the 3,000 was in white, a Sunday best that gave evidence of a lot of care and attention on mother's part. Every school showed its colors in rather an attractive way.

Here would come a column of red hair ribbons and when the column paused and broke up you got the notion that the meadow in that vicinity had suddenly bloomed with poppies. That was Public Bloomed with poppies. That was Public School 56, of which Miss Paele is prin-cipal. Then when you looked off to one side you saw sunflowers nodding, a big bed of yellow blossoms, and you felt in-

red of yellow blossoms, and you felt in-clined to compliment the principal of School 45, Miss Tare, on a neat idea. Right in front of the flag draped stand, where a schoolboys' band from Brook-lyn made music for the dances, were the children of School 80, the colered girls, whose ribbons were white and green. About half of the 100 children were kindergartners who had a dreadful time isceping their feet in the mazes of the wedish and Russian dances. They would all down and have to be picked up, and they fell and rolled and bounced like at let of highly animated ribber palls at ot of highly animated rubber balls at play with themselves. Everywhere there was color, blue and white among the girls of 31, purple and white where the May pole of 62 was upraised and enough pink wherever you looked to fit out the little girls in New York with a year's hair vibtons.

The process of getting May poles up that breeze was something like an The process of getting May poles up in that breeze was something like an army going into camp. Varicolored streamers lashed the air and giris clung pluckily to the swaying staffs, sometimes going over in a heap as the breeze had its way all of a sudden. But after time, with the assistance of park employees and policemen and volunteers, the streamers were pegged down and with the poles took on the appearance of gay tepees.

Miss Burchenal fairly flew over the meadow, dropping a word of advice here, lending a hand there and consulting her chart book to see if such and such a school was where it ought to have been. While the girs were serious and intent see making a fire showing the influence. While the giris were serious and intented on making a fine showing, the influence of the sun and air was upon them, and each teacher had to keep an eye out to see that her school didn't get mixed up with somebody's else school. While these things were forward you noticed especially the small colored giris of Sphool 89. They were poised, waiting for the first bars of the music, like kittens ready to spring. And when the music started, even before the signal came to start the dance, they couldn't keep their start the dance, they couldn't keep their feet still. None was more graceful in the dance than these same children. At last Miss Burchenal was satisfied

that everything was in readiness. She jumped into the stand, swept her eye over the meadow full of children, each over the meadow full of children, each school in position, each child's toe pointed, and raised her hand. The band, with a crash of brasses, started a Swedish May day air, and the field swiftly became alive. Dancing by itself, each school kept time with the others, and there was a measured and accurate movement of small legs and feet and hands whatever way one looked. It was a good deal like watching an enormous circus, except that there were a great many morrings and vastly more performers.

There was a brief rest; then Miss Burchenal signallet for the tarentella, a dance that was a little more elaborate. The steps were simple enough, but it seemed

stops were simple enough, but it seemed amazing that 3,000 children, trained in separate squads, were able to keep such splendid time. Presently Miss Burchenal fired a pistol, the signal for the patball game. The schools formed in two rows, each row opposing the other. The girls at the rear of the rows seized the ball and ran with it circling around the and ran with it, circling around the seacher, who was a sort of stakeboat, and back to the rows, where they delivered the balls to their lines. The ball was passed backward until it was seized by the girl who was then at the rear of ine row. She took up the running. The game ended when all the girls of one side ill health.

had made the run and were in their original positions before the other side had completed the round.

had completed the round.

The dances followed each other rapidly then. "Reap the Flax," to a Swedish air; a Russian dance, another Swedish dance; and two old English dances were exhibited before the girls seized the streamers and wound them around the maypoles to the music of the band. What followed was the best part of the show.

was the best part of the show. You have seen college men swarm into the grid ron after their team had won and the grid: ron after their team had won and go careering and swaying around the field, singing and dancing and weaving in and out. Well, 3,000 little girls did something of the same kind of thing after the programme had been finished. School by school they took up the romp, flowing toward the stand from every part of the field. Pretty soon they were massed solidly around the stand and giving Miss Burchenal a handkerchief salute. She reviewed her small army with the air of a Major-General, nodded thanks and signalled the band to play "The Star Spangled Banner."

The minute the music ceased the chil-The minute the music ceased the children broke and scampered for the exits and the policemen had a lively time for

AUTO STUCK ON TRACK. Freight Train Hit It and C. Rogers Smith,

Owner, Leaped Too Late Badly Hurt. MIDDLETOWN, N. Y., June 7.-With his automobile stuck in the middle of a railroad crossing this morning and a freight train approaching at high speed, C. Rogers Smith, a resiathletic. She is the inspector of athletics, dent of this city, waited until the last instant before leaping in the effort to save instructing teachers how to keep their his motor car. Then as the locomotive was almost upon him he leaped, but was an eye on the children to see that they are struck while in the air and knocked a distance of twenty feet. Both legs and his collarbone were broken and he was

otherwise injured. Mr. Smith is a dealer in monuments. with an office at 527 Fifth avenue, New York city. He is well known throughout this part of the State. He drove his motor car to Johnson, eight miles from this city, to transact some business and as he approached the crossing of the New York, Susquehanna and Western Railroad he apparently did not hear the freight train approaching. As he drove upon the crossing it is believed that he nitempted to change his gear to make a hill on the other side of the crossing. His car stopped dead on the track, and although he saw the train approaching he big crowd that was sure to come. Also made every effort to start it. Failing, he leaped just as the locomotive struck the

The train was stopped and the injured man placed on board and brought to this city in record time. He was taken to Thrall Hospital, While his injuries are serious it is believed he will recover. The wreck of the automobile was carried on the locomotive for some distance

CONEY ISLAND REVISITED. Mrs. Moriarta Sees It After a Lapse of 30 Years.

Mrs. Webster C. Moriarta, who owns Moriacta's restaurant and an apartment house in Saratoga, came to New York the day before vesterday to get a staff of servants and at night saw Coney Island for the first time in thirty years. This might not be considered odd, but Mrs. Moriarta lived in Brooklyn when a stirl and used to go to Coney Island as often as she could until she want to Engage to sayly readings. How she could rope to study medicine. by Mrs. Moriarta yesterday at the Wol

You see," said Mrs. Moriacta, "it was all because I have so much energy that I felt I must have an occupation after I got married. I lived in Europe ten years, part of the time in London, and the reat in Paris. I got my M. D. from Weldon College, London, and I also completed es as a medical electricial and a ist. I came back, but not to Brook-I went to Washington and practised ourses as a medical there for several years, and there I that my present husband. His home was in Saratoga, and when he took me there I found I could not well practise because my brother-in-taw was a physician. my guests in a fourth house. Of course this gives me something to occupy my

toga because affairs are so mixed up in the place. The people who pump the car-bonic out of the water and ship it have taken out so much gas that the springs don't spout as they used to. There are all sorts of injunctions and mixups. My husband, for instance, who is pressdent of two spring companies, has to go to his neighbor and buy from him the gas that has been pumped out of his spring water and then pump it back again.

"It was in quite a different fashi on that I visited Coney Island last night from the way I used to go there when a girl. I was whizzed down there in an autorothile.

whizzed down there in an automobile. We used to go in queer little cars drawn by dummy engines thirty years ago. At that time Culver's old hotel was the leading establishment of the place. The main attraction, in my opinion, were 'evy's and Gitnore's concerts.

"Norton's Point was the end of the

"Norton's Point was the end of the island, and no respectable person was supposed to be seen in that neighborhood. It was considered awful to venture below Culver's. We girls used to enjoy walking on the boardwalk and buying popcorn and frankfurters, which were even then the stands products of the island.

the staple products of the island.
"Coney was then simply a siretch of beach with rows of shantles. Last night I seemed to have awakened into a new world when I saw it. In those old days
Tom Thumb had a little show at Brighton
Beach and I used to be fond of going to
see him. On the island the chief amusements were always and the chief amusements were cheap little sideshows and merry-go-rounds. On Sundays we used go to there often to spe nd the day."

BALDWIN'S RISKY FLIGHT. Soars Over Hempstead in Stiff Breeze

GARDEN CITY, L. I., June 7.-Capt." Baldwin made a short but very risky flight at Hempstead Plains this evening. It was announced an hour before dark

Capt. Baldwin had his aero out adjusting it and was urged by some to make a short flight. He refused, but said he would skip along the ground just enough to show how the machine worked. He tarted and several times just left the round and then the lure of the air preailed and despite the risk he shot up ound the course to a height of 40 feet and out the serious of the serious flight. Some taken from the sermon, but you may preach your own sermon from it. It is addressed to the alumni of Union College. LEE O'NEIL BROWNE'S CASE.

Many and Novel Pleas for Delay Made by Defendant's Counsel All Passed Upon in the Negative-Work of Selecting a Jury Begins Despite Protests

CHICAGO, June 7 .- The trial of Repre ntative Lee O'Neil Browne was begun before Judge McSurely in the Criminal Court shortly after 3:30 this afternoon, but not until attorneys for the decity; Miss Julia E. Hand, Brooklyn; Miss fense had made every effort to procure a postponement. A motion to have the prisoner dis-

charged first was made, and when this was overruled a motion to continue the case until June 20 was offered. This also was overruled by Judge McSurely, and a Circuit Court of Appeals Refuses to G. P. Huntley and Hattle Williams to Be Br MacCracken Helps the Outgoing unique motion which would act to the end of having the Browne case tried according to its number on the Criminal Court cal ender was made, and this too was refused. The reasons advanced by Attorney For-

rest for a delay were those which he recited when a similar motion was last made, June 1, and also on the following grounds: That at the time he had informed the Court that it would be necessary to make an investigation of matters in three States.

That since that time it has become apparently necessary to make an investigation in four States

"I am informed," said Attorney Forrest, that evidence will be introduced of several trips across the liftle during July or August. 1999, by the defendant. Lec O'Neil Browne, and Charles A White, a witness. I understand it is claimed by the State that this is material because they aver that White spent something like \$2,000 on the trips, proving, they contend, they aver that White spent something like \$2,000 on the trips, proving, they contend, that White had a large amount of money upon him. He will contest that and show that not more than \$200 was spent at any time. To do this, however, we will have to go to Muskegon and St. Joe, Mich., to which points the trips were made. We also found it necessary to go to New York city to make an investigation in connection with a letter said to have been written by White to Senator Lorimer some five or White to Senator Lorimer some five or
